Why Work at Delsys?

A positive work environment for budding engineers to develop critical thinking skills

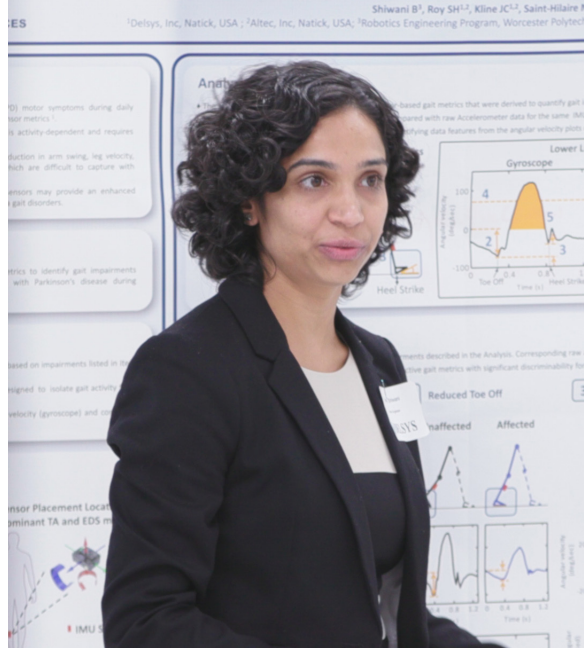

VICTORIA KYLE

Hardware Co-Op & B.S. Student
WIT 2020

I am fortunate to have completed two co-ops at Delsys on the Product Development Team in 2019.

My 8-months at Delsys enabled me to be involved in a range of product releases, which was an exciting and unique experience as a co-op.

Delsys also provided the opportunity to work with a talented, interdisciplinary team on all aspects of company operations from development to client support.

Delsys is a proving ground and a perfect match for skilled research-minded engineers

BHAWNA SHIWANI

Research Scientist
Delsys, Inc.

I have been with Delsys since 2016, as an intern, research engineer and now a research scientist.

Delsys has been a proving ground for me to sharpen my engineering skills & critical thinking.

It is a perfect place for high-capacity engineers looking to work in a highly collaborative innovative & fast-paced environment to develop assistive technologies for solving a myriad of complex motion disorders.

Delsys has empowered me to explore purpose-driven scientific work

MICHAEL TWARDOWSKI

Research Engineer & PhD Student
WPI 2020

I joined Delsys in 2015 as an intern, followed by my doctoral education at WPI through a fellowship fully funded by Delsys.

Delsys paved a meaningful path for me transitioning from active military service to engage in academic pursuits to solve critical challenges in movement sciences domain.

The one-on-one mentorship I continue to receive at Delsys is simply matchless.
